THE BOLLING FARMS NURSERIES

MAY 11 1927

Spring Planting Catalog

NURSEYMEN--LANDSCAPE ARTISTS
BOLLING — ALABAMA

DIRECT FROM NURSERY TO YOU

OUR PLAN SAVES YOU MONEY

We find that ordering by mail is quick, cheap and convenient, the goods coming to you direct by parcel post or express. Compare our prices with other prices. The goods are all raised here in Alabama, close to you, one or two days at the most from the nursery en route. If there is something that you want that you do not see in our catalog write us—we have it, and we will forward you prices.

We are prepared to handle large orders of any description. You simply mail your orders to us, enclosing your check or money order, and we will ship to you direct at the proper season for planting. State in your letter or on your order blank whether fall or spring planting is desired and your goods will reach you at the proper season.

In this catalog we have incorporated many useful suggestions on how to use and grow

nursery stock. If there is any information you need that is not given here, write us, we will be glad to answer any inquiry.

HOW TO ORDER

Use one of our order blanks or letter, giving your town and street number, or if in the country, your R. F. D. and box number.

OUR GUARANTEE

We exercise the greatest care to keep our stock true to name and are always ready, willing and anxious at all times to replace, on proper proof, all stock that may prove otherwise or refund the money paid. It being mutually agreed between the purchaser and ourselves, however, that we shall not at any time be liable for any amount greater than the original price paid for trees and shrubs.

If goods are not accepted upon these conditions they must be returned and money will be refunded. All orders are accepted upon the condition that they shall be void should injury befall the stock from frost, hail, fire or other cause beyond our control.

QUALITY GOODS WELL PACKED

Our goods are all first quality. We do not ship seconds, thirds or culls. You get sturdy, well rooted plants which are almost sure to grow, provided you give them reasonable care. The stock is grown in Central Alabama and is hardy in this climate.

Our goods are packed in wet sphagnum moss and thoroughly wrapped either for parcel post or express shipments. In ordering from us you have the advantage of getting fresh stock delivered quickly. Stock does not suffer from long shipment or delay on the road.

We advise placing orders early. This gives us time to assemble and have your goods out on time. We accept orders at all times of the year, and wish to assure our many patrons who are now our customers, as well as new ones, that they will always find our goods, as in the past, first class in every respect.

To our new patrons—a trial order will convince you.

TERMS: Our terms are cash with order. Either a check or money order will be acceptable. We make no C. O. D. shipments. This policy enables us to offer the first quality stock at reasonable prices. This means a genuine saving for you.

We take particular care in the growing and handling of our stock to be able to deliver good healthy plants in the best of condition for planting. Only those varieties particularly adaptable and suitable to this region are featured. Our products have given such satisfaction that every buyer has become a staunch friend and booster for our nurseries.

Special prices on large orders.

ORDER EARLY

And make sure you get your entire order. Goods are packed in the sequence in which orders are received. This means that the earlier orders can be readily filled. Our stock may be depleted later in the season.

PECANS

ARE A PAYING INVESTMENT

WE SPECIALIZE ON PECANS

OUR Nursery is ideally situated for quantity production of pecan stock. Due to this and the ever-increasing popularity of the Pecan nut for commercial growing and home use, we offer a fine line of pecan trees in the various sizes in any quantity desired. We offer the best varieties, having large size, good flavor, thin shell and easy cracking qualities. They are hardy and satisfactory.

PECAN ORCHARDS PAY

Give a pecan orchard the same care and attention given a corn or cotton crop and the results will repay you many fold. The pecan is long lived. When the trees are cultivated, fertilized and properly pruned they should bear in five years, bear paying crops at eight years and should produce 16 to 20 pounds of nuts per tree in ten years.

WHEN AND WHERE TO PLANT PECANS

A deep, fertile soil, sufficiently porous to admit of free root growth, well drained, yet by no means dry, is considered best adapted to pecan culture.

Trees should be set out 60 feet apart or twelve to the acre. It is advisable to dynamite holes and set in the trees as soon after they become dormant as possible. December or January are the best months, as the roots will have time to become firmly set before the Spring growth begins.

TREES TO THE ACRE

- 27 trees to acre, planted 40 ft. x 40 ft.
- 22 trees to acre, planted 45 ft. x 45 ft.
- 18 trees to acre, planted 50 ft. x 50 ft.
- 15 trees to acre, planted 54 ft. x 54 ft.
- 12 trees to acre, planted 60 ft. x 60 ft.

VARIETIES

Schley—Probably the best known and most widely disseminated variety. Shell very thin, kernel plump, quality very rich and flavor excellent. A regular bearer.

Stuart—One of the more extensively planted varieties. Medium to large in size. Shell of av-

erage thickness, plump, of good quality and sweet flavor.

Success—A widely planted variety. Shell of medium thickness, fine flavor. Consistently good bearer.

Frotcher—Widely disseminated, of large size and very thin shell.

Moneymaker—Medium size, oblong, rounded, cracks easily, kernel rich, plump and full. An early and heavy bearer.

OUR REASONABLE PRICES

	1 Tree	10 Trees	100 Trees
2 to 3 ft...	\$.90 each	\$.80 each	\$.70 each
3 to 4 ft...	1.00 each	.90 each	.80 each
4 to 5 ft...	1.15 each	1.00 each	.90 each
5 to 6 ft...	1.30 each	1.10 each	1.00 each

HOW TO PLANT PECANS

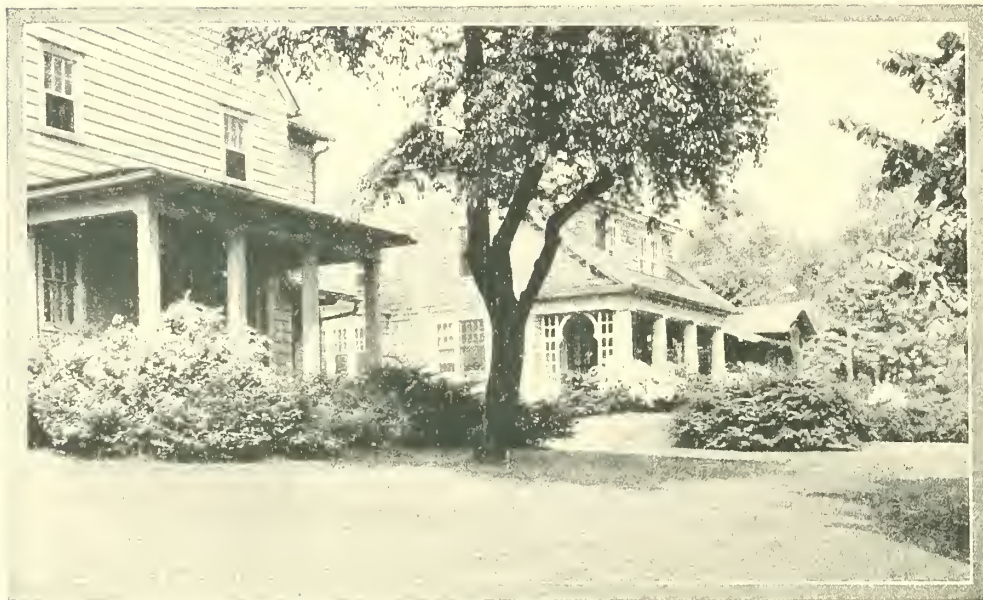

Keep roots covered with moss or wet sacks at all times before planting. The roots must not dry out. Dig hole for tree before exposing roots. Hole should be 2 feet wide and deep

enough to set tree trifle lower than it stood in nursery. When hole is dug, take one tree and cut off ends of broken roots with sharp knife. Cut off part of tap root so the tree will force lateral roots. Fill hole half full around roots with well pulverized top soil enriched with either the proper amount of well rotted stable manure, bone meal, or high grade fertilizer, thoroughly mixed with the soil.

Pack earth firmly as the hole is filled, but leave two inches of loose soil on top. When soil is very dry, pour water in hole when partly filled. Trees over four feet should be cut back to four feet height after planting. Be careful not to break eyes of trees when handling. Keep trees cultivated and properly pruned. Between the rows, you may plant cotton, peas, potatoes, melons, or any cover crop for several years, but never small grain. When trees go into bearing, plant and turn under a crop of peas, soy beans, vetch or clover.

Excellent results are obtained in planting Pecans with dynamite—one-half pound of dynamite placed two feet below level is ample.

THIS CATALOG SUPERSEDES ALL PREVIOUS PRICE LISTS.

ORNAMENTAL SHRUBS

PEOPLE generally, are appreciating more the permanent value and beauty of shrubs. The charm and grace they lend to home grounds is invaluable, and, if judicious selection is made, it is possible to have a continuous succession of bloom from early in April to the days when the frost again nips the flowers of the very latest to bloom.

In many cases it would be better to plant shrubs in groups of several to one side of the lawn instead of following the method of planting one in a certain place and spoiling the effect of the open lawn. In most cases, three, six, eight, or twelve of one variety should be used in a particular grouping. Several such groupings make an excellent border or foundation planting.

Buddleia lindleyana. (Butterfly Bush)—This is a rapid grower with small narrow leaves. Its panicles of purple flowers are very effective when planted in masses.

Prices:	Each	10
2 year	\$.60	\$5.00
1 year50	4.00

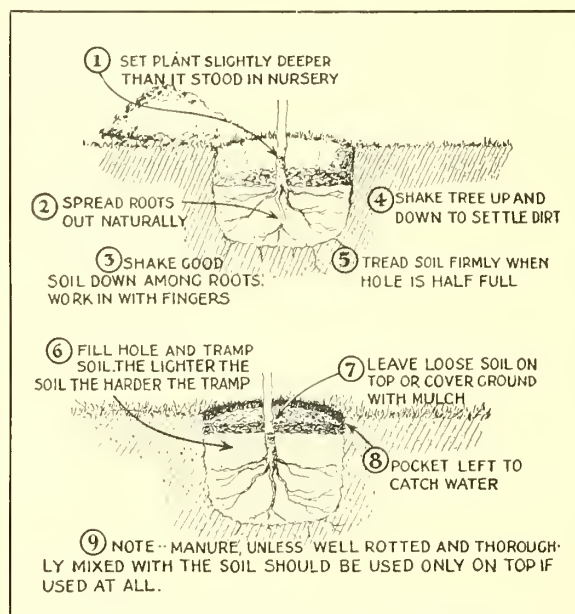

Calycanthus floridus. (Common Sweetshrub) — Double flowers of chocolate color and very fragrant. It begins blooming in early April, lasting several weeks.

Prices:	Each	10
2-3 feet	\$1.00	\$9.00

18 to 24 inches	\$.60	\$5.00
12 to 18 inches50	4.00

THE BEAUTIFUL SNOWHILL HYDRANGEA

VANHOUTTE SPIREA (BRIDAL WREATH)

Kerria Japonica Fl. Pl. (Double Kerria)—Globe flower of spreading habit, having double yellow blossoms about 1 inch diameter. Effective for massing, attaining a height of about 5 feet.

Prices:	Each	10
2 to 3 feet	\$.75	\$6.50
18 to 24 inches50	4.50

Lonicera fragrantissima. (Christmas Honeysuckle) —Winter honeysuckle, sweet scented, pinkish, white flower appearing in February.

Lonicera Morrowi. (Morrow's Honeysuckle) — A Japanese variety producing in early April a profusion of white flowers, followed by a mass of bright red fruit.

Lonicera Ruprechtiana. (Manchurian Honeysuckle) Flower pure white, berries red and yellow, very showy.

Lonicera Tatarica rubra. (Tatarian Honeysuckle) — Beautiful, upright, medium growth with purplish red flowers followed by crimson fruit.

Prices:	Each	10
3 to 4 feet	\$.60	\$5.00
2 to 3 feet50	4.00
18 to 24 inches40	3.00

Philadelphus. (Mock Orange)—This is a handsome, vigorous shrub with large foliage and beautiful white flowers, blooming in profusion in April and May.

Prices:	Each	10
2 to 3 feet	\$.50	\$4.00
18 to 24 inches40	3.00
12 to 18 inches30	2.00

SPIREA

A very important group of free blooming shrubs showing great variation in size, character and time of bloom. Unusually showy, requiring a fairly rich soil.

Spiraea Anthony Waterer—Free flowering, crimson blooms in rather dense corymbs. Compact, 3 to 4 feet. If blooms are cut off as soon as they begin to fade, the plant will bloom the entire season. Makes a low-growing border.

Prices:	Each	10
24 to 30 inches	\$1.00	\$9.00
18 to 24 inches75	6.50

Spiraea arguta. (Garland Flower).

Prices:	Each	10
30 to 36 inches75	\$6.50
24 to 30 inches60	5.00
18 to 24 inches50	4.00

Spiraea billiardi alba. Flowers white produced in long dense panicles, blooms from May throughout the summer.

Spiraea billiardi rosea. Brown, hairy branches, bright pink flowers, bloom during June and July.

Prices:	Each	10
3 to 4 feet	\$.60	\$5.00
2 to 3 feet50	4.00
18 to 24 inches40	3.00

Spiraea douglasii. Flowers deep pink in dense panicles. Upright grower, 4 to 6 feet. Blooms during June and July.

Prices:	Each	10
2 to 3 feet	\$.50	\$4.00
18 to 24 inches40	3.00

MOCK ORANGE OR SYRINGA
PHILADELPHUS CORONARIUS

Spiraea prunifolia plena. (Double Bridalwreath)—Long sprays of white, double flowers. Practically covering the stem. 4 to 6 feet. Blooms in March.

Prices:	Each	10
4 to 5 feet	\$.75	\$7.00
3 to 4 feet60	5.50
2 to 3 feet50	4.50
12 to 18 inches40	3.50

Spiraea vanhouttei. A graceful shrub, growing six to eight feet in height. Produces a profusion of single white flowers during the latter part of March. One of the most popular Spireas.

Prices:	Each	10
3 to 4 feet	\$.75	\$6.50
2 to 3 feet50	4.00

Symphoricarpos racemosus. (Common Snowberry)—A graceful shrub, growing four to six feet tall, slender drooping branches, flowers white, followed by clusters of white berries which remain upon the plant for months.

Prices:	Each	10
2 to 3 feet	\$.50	\$4.00
18 to 24 inches40	3.50

Symphoricarpos vulgaris. (Coralberry)—A native shrub, growing naturally from New York to Texas; four to six feet tall. Purplish red berries are produced in great profusion. They remain upon the plant all winter, making it especially desirable for landscape planting.

Prices:	Each	10
2 to 3 feet	\$.50	\$4.00
18 to 24 inches40	3.50

Weigela. (Diervilla)—Hardy, profuse-blooming shrubs of spreading habit. These are among the showiest of the garden shrubs, producing in early April great masses of showy flowers.

Amabilis (rose).
Gigantiflora (white).
Rosea.
Steltzner (pink).
Vanhoutte (pink).

Prices:	Each	10
3 to 4 feet	\$1.00	\$9.00
2 to 3 feet75	6.50
18 to 24 inches60	5.50

Weigela hybrida candida. (Snow Weigela)—Pure white; excellent.

Prices:	Each	10
2 to 3 feet	\$.75	6.50
18 to 24 inches60	5.50
12 to 18 inches50	4.50

WEIGELA ROSEA

Weigela hybrida Eva Rathke. Flowers deep carmine red; profuse bloomer and continues in bloom for a long time.

Prices:	Each	10
12 to 18 inches	\$.60	\$5.00

Weigela rosea variegata. Flowers similar to rosea, but foliage variegated.

Prices:	Each	10
2 to 3 feet	\$.75	\$6.50

12 to 18 inches50	4.50

SPECIMEN SHRUB COLLECTION

Eight beautiful shrubs for all Summer blooming, suitable for foundation or lawn planting. Offered at a substantial saving.

- 1—Syringa, Mock Orange
- 1—Spiraea, Anthony Waterer
- 1—Honeysuckle, Fragrantissima
- 1—Abelia Grandiflora
- 1—Forsythia, Golden Bell
- 1—Deutzia, Pride of Rochester.
- 1—Spiraea, Van Houttei
- 1—Japan Privet

Special price for the above group of eight shrubs—large, well rooted with fine bushy tops.
less 10% cash with order..... **\$6.00**

F. O. B. Bolling.

BROAD-LEAVED EVERGREENS

FOR YEAR ROUND BEAUTY

THERE is no finer class of material for foundation planting, and all forms of general landscape planting than the broad-leaved evergreens. They have variety in form, color, texture and flower. In winter when other things are somber and dull looking, the broad-leaved evergreens lend warmth and cheer to the grounds.

Abelia grandiflora. (Glossy Abelia)—One of our most beautiful, popular and satisfactory Broad-leaved Evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of May until frost this plant produces an immense quantity of tubular-shaped white flowers about an inch long which are borne in clusters. During the growing season it is advisable to pinch off the ends of the long shoots. This will make the plant dense and compact. For single specimens, for groups, or for a hedge we cannot too strongly recommend this plant. Hardy as far North as Philadelphia. Has also been successfully grown in sheltered positions in Massachusetts, and, even when partially killed back, the young shrubs flower profusely the same season.

Prices:	Each	10
2 to 3 feet	\$1.00	\$9.00
18 to 24 inches80	7.00
12 to 18 inches65	5.50

Strong plants from open ground.

Buxus sempervirens arborescens. (True Tree Box)
—We offer a fine lot of very compact, thrifty plants of our own growing.

Prices:	Each	10
12 to 15 inches	\$1.00	\$9.00
8 to 12 inches75	6.50

Buxus sempervirens suffruticosa. (True dwarf Box)
—This is the variety so extensively used in the old-time gardens for edging walks and beds. It is of very slow growth, and its ultimate height is from four to five feet. The plants should be set from three to four inches apart. We offer a superb lot of home-grown plants.

Prices:	Each	10
6 to 8 inches	\$.60	\$5.00

LIGUSTRUM LUCIDUM

VINES —

ADD CHARM and BEAUTY

WITH their variance in color, their beauty of foliage and blossom, their grace wherever used, these vines frequently provide the finishing touches of any planting. Some adhere to the masonry, some must be trained through lattice or trellis and others with their tendrils will cling tenaciously, unshaken by wind or weather.

PRIVET—The Ideal Hedge Plant

We grade California and Amoor River Privet "heavy" and "light", according to the number of canes. The 18 to 24-inch and all up "heavy" grades carry four or more strong canes from the ground. The "light" grades in these sizes carry two or three strong canes.

The 12 to 18-inch "heavy" grade carries three canes or more and the 12 to 18-inch "light" only two

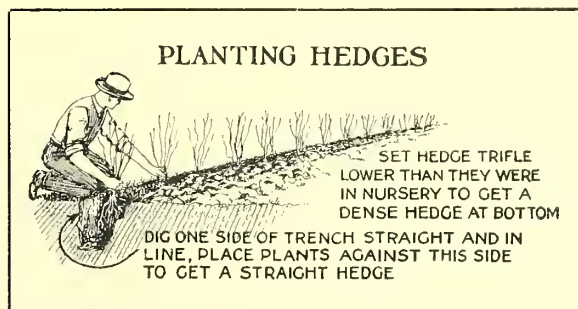

canes. All single stems are put in the "transplanting" grade.

ARBOR VITAE

AND OTHER CONIFERS

EVERGREENS are important in any planting. Green of every shade and hue, charmingly contrasted with blue, gold and gray, their foliage is always pleasing. Pyramidal or erect, globular or spreading, you can find forms for every fancy. For groups or screening, in shelter planting or hedges you have nothing quite to equal them. In summer they are attractive, in winter they offer a comforting note to the bleak landscape.

Arborvitae. (Biota and Thuja)—These are beautiful evergreen trees having a compact, symmetrical habit of growth. They are well adapted for formal plantings and as individual specimens and also in some instances as hedges.

Thuja occidentalis pyramidalis. Pyramidal. American Arborvitae. This is the leading evergreen hedge plant, although equally attractive as a specimen or as a background for other plants.

	Each	10
24 to 30 inches	\$2.00	\$17.50
18 to 24 inches	1.75	15.00
12 to 18 inches	1.25	10.00

Thuja orientalis. Chinese Arborvitae. A tall growing hardy pyramidal tree with dark green foliage, holding its color throughout the winter.

Prices:	Each	10
4 to 5 feet	\$5.00	\$45.00
3 to 4 feet	3.00	25.00
2 to 3 feet	2.00	15.00
